MICRO-START

The Antigravity Batteries MICRO-START products are the Worlds Smallest Jump Starters/Personal Power Supplies. So small they can fit in your POCKET, yet so powerful they will easily start V8 and Diesel Motors up to 30 times in a row. But amazingly they also Power or Charge all of your Electronics Devices such as Laptop Computers, Smart Phones, Tablets, Go Pro Cameras, iReaders, Blue Tooth Devices and more...

How do they do this? Well, the MICRO-START is a self contained Lithium-Ion Power Supply that allows you to charge it and easily take a personal back-up power supply with you where ever you go... No need for an electrical outlet or charging station. Just pull out your MICRO-START and charge any of your electronics devices or Jump Start your vehicle. All models also have a built in HI-Power LED flashlight with SOS and Strobe patterns.

There are currently 4 models to choose from... From our smallest, which is the size of a Smart Phone, but capable of starting V6 motors , to our largest that can start Diesel Motors yet still fit in your pocket! Each comes complete with a carry case and all items necessary to Jump Start your vehicles or power your electronics... including Mini Jumper Clamps, USB Cables, Laptop cables, 12v accessory cables and a Mobile and Wall Chargers for the MICRO-START that allow you to charge it anywhere.

The MICRO-START is a product everyone can benefit from, it's perfect for Drivers, Riders, Campers, Travelers, Students, Mechanics and more. It fits into pockets, purses, backpacks, gloveboxes, luggage and is legal for air travel. So, no longer worry about coming back to a dead battery in your car, or you laptop dying when you have that last bit of work to finish, the MICRO-START can save you from all your dead battery emergencies.

Once you try a **MICRO-START** you won't leave home without one!
